01 Preface

Since its founding, BitRaxx has been driven by a clear mission: To redefine trust in the crypto world through security-first innovation and a truly user-centric trading experience.

Unlike most projects that launch a token before a product, BitRaxx has taken the opposite approach — building a fully operational trading platform before releasing its native token, BRX. This ensures that every token launched is backed by a live product, real utility, and a clear roadmap.

Platform Delivered at Launch

- ◆ Real-time spot trading
- ◆ BitRaxx Shield™ built-in trade insurance
- ◆ Advanced security architecture
- ◆ Multi-network asset support
- ◆ Seamless wallet integration
- ◆ (Ethereum, TRON, BSC, Solana)

To power this ecosystem, BitRaxx introduces **BRX** — the native utility token that serves as the engine of the platform. From insurance coverage and fee discounts to staking and exclusive access, BRX creates a sustainable, demand-driven economy that rewards holders and supports long-term expansion.

02 Why Choose BitRaxx?

BitRaxx is not just another crypto exchange. It is a high-performance trading platform built to deliver precision, protection, and power to every user — from beginners to professionals.

BitRaxx Shield™

Built-in trade insurance protecting users against losses of up to 40% — a global first in crypto.

Unified Wallet

Manage multiple chains, tokens, and assets under one seamless, intuitive interface.

Matching Engine

Processes over 1 million orders per second — zero delay even during peak market volatility.

Multi-Chain

Trade across Ethereum, BNB Chain, TRON, and Solana — with future L2 and cross-chain swap support.

Platform First

The product went live before the token. BRX enters a live, fully operational ecosystem from day one.

03 Platform Features

Trading Tools

- ◆ 100+ verified, audited crypto asset listings at launch
- ◆ Market, Limit, and Conditional Orders with stop-loss and take-profit
- ◆ Copy Trading (Coming Soon) — follow top performers transparently
- ◆ Real-Time Charts and Analytics for data-driven decision making
- ◆ 24/7 Human Support — real people, zero bots, zero delays

Upcoming Features

Feature	Timeline	Description
Staking & Passive Rewards	Q3 2026	Earn competitive returns on BRX holdings
Launchpad	Q4 2026	Early-stage token access for BRX holders
LaunchPool	Q4 2026	Safe, yield-generating participation pools
Perpetuals	2027	Advanced derivatives trading instruments
Cross-Chain Swaps	2027	Seamless multi-network asset transfers

04 Security Architecture

Every layer of the BitRaxx platform is engineered on trust, transparency, and bulletproof protection — without compromise.

Bank-Grade Encryption

All data transfers protected with military-standard encryption protocols

Hot/Cold Wallet Segregation

Risk isolation through strict separation of operational and reserve wallets

AI-Powered Anomaly Detection

Real-time identification of suspicious activity before it reaches users

Multi-Layer Access Controls

Unauthorized actions restricted at every system level

1:1 Reserve Backing

No fractional reserve. No hidden lending. Full asset coverage, always

Multi-Signature Authentication

Critical withdrawals require multiple verified approvals

Weekly Internal Audits

All wallets publicly verifiable via blockchain explorers

Dedicated Protection Fund

Emergency coverage fund maintained and replenished at all times

Regulatory Commitment BitRaxx is preparing to operate under global best practice regulatory standards, committed to becoming one of the first fully licensed global crypto exchanges from the MENA region.

05 Technical Superiority

At the heart of BitRaxx lies a next-generation trading engine — engineered for speed, stability, and scale, delivering institutional-grade performance without sacrificing the retail user experience.

Capability	Specification	Advantage
Matching Engine Speed	1M orders/second	Sub-millisecond execution latency
Architecture	Distributed / Modular	Auto-failover and intelligent load balancing
Data Pipelines	Real-time streaming	Live market insights and instant execution
Uptime SLA	99.99% guaranteed	Zero downtime during peak volatility
Encryption	At-rest and In-memory	Every technical layer fully hardened
Order Book Depth	Deep liquidity pools	Consistently low bid-ask spreads across assets

06
BRX Tokenomics

Token Name	BitRaxx Token
Token Symbol	\$BRX
Total Supply	200,000,000 BRX
Blockchain	BNB Chain (BEP-20)
Private Sale Start	May 10, 2026
Private Sale Price	\$0.005 per BRX
ICO Phase 1 Start	May 15, 2026
ICO Phase 1 Price	\$0.015 per BRX
First Listing (Est.)	September 3, 2026

25%	Ecosystem & Rewards
20%	Staking Pool
15%	ICO
15%	Team & Advisors
10%	Reserve
10%	Private Sale
5%	Marketing

07
BRX Token Utility

Core Utilities

- ◆ Launchpad Participation — BRX holders access exclusive launchpad offerings via native staking pools
- ◆ Fee Reductions — Up to 50% discount on spot, futures, withdrawal, copy trading, and affiliate fees
- ◆ Dust Conversion — Convert leftover crypto dust into BRX with a single click
- ◆ Trading Rewards — BRX distributed for futures trades, copy trading, liquidity mining, and referrals
- ◆ Staking Rewards — Competitive returns via official staking pools with flexible lock-up options
- ◆ BitRaxx Shield™ — Activate built-in trade insurance covering partial losses from liquidations
- ◆ Governance — Vote on platform upgrades, token listings, and strategic proposals

VIP Holder Benefits

Benefit	Description
Exclusive Airdrops	Project airdrops, seasonal vouchers, and branded merchandise
VIP Status	Minimum BRX holding unlocks fee discounts and priority support
Enhanced Staking	Preferential interest rates and early access to financial products

Benefit	Description
Affiliate Boost	Higher commission tiers and improved revenue sharing
Copy Trading Edge	Increased visibility and platform support for top holders
Investment Fund	Angel investment round access for major BRX holders

08 BRX Economic Model

◆ Application Layer

- ◆ Ecosystem Empowerment — Launchpad, LaunchPool, rewards, and staking programs
- ◆ Contract Insurance — BRX covers liquidation losses in copy and margin trading
- ◆ Staking Programs — Platform tasks, limited-time pools, and Super Node programs
- ◆ Fee Discounts — Every BRX used for fee discounts is permanently burned from circulation

◆ Community Layer

- ◆ Wide BRX usage increases community consensus and organic engagement
- ◆ Expanding holder base reduces market selling pressure organically
- ◆ Affiliate commissions and airdrops drive viral, community-led growth

◆ Supply Control

- ◆ Burn (Fee Discounts) — BRX used for fee payments is sent irreversibly to a dead address
- ◆ Burn (Insurance) — Shield™ activation burns additional BRX, reducing circulating supply
- ◆ Lock-Up — Portions locked in protection and node staking pools
- ◆ Halving — Mining rewards follow a scheduled halving to reduce emissions over time

Self-Sustaining Loop As demand for platform services increases, BRX scarcity and value grow proportionally — fostering mutual benefit for the platform and the entire community.

09 User Incentive & Staking Plans

Transaction Mining

Users earn BRX tokens as mining rewards based on trading activity. Rewards are allocated proportionally to each user's share of total transaction volume within the mining pool — the more you trade, the higher your BRX mining rewards.

Dual-Currency Staking Phases

Phase	Duration	Daily BRX Release	Pool Pairs
Phase 1	30 Days	10,000 BRX / day	BRX + USDT / BTC / ETH
Phase 2	30 Days	5,000 BRX / day	BRX + USDT / BTC / ETH
Phase 3	30 Days	2,500 BRX / day	BRX + USDT / BTC / ETH

Single-Currency Staking

Users can stake BRX via the official platform or on-chain DApps. Yield formula: **(Annual Yield × Staked Amount × Duration) / 365**. Both flexible and fixed return options are available, with yields generated through user borrowing, platform returns, and BRX ecosystem activities.

10 Global Affiliate & Growth Program

280+

Active Affiliate Teams

76

Countries Covered

500+

KOLs Targeted

Affiliate Benefits

- ◆ Enhanced Commission Rights — BRX holders gain premium rates and priority support
- ◆ Custom High-Reward Campaigns — tailored BRX events with exclusive bonuses
- ◆ Incentive Airdrops — scheduled for long-term holders and influential community partners
- ◆ Growth Tools — customized plans, technical consulting, and promotional toolkits
- ◆ Exclusive Products — access to high-yield earning programs and marketing resources

Super Node Program

Stake BRX to become a Super Node and receive rewards from DPoS-based reward pools. Premium nodes unlock enhanced visibility, profit-sharing, marketing boosts, and elevated commission structures.

Node Type	Entry Criteria	Key Benefits
Super Node	High BRX stake + performance	DPoS rewards, profit-sharing, marketing boost, premium commissions
Ordinary Node	Standard BRX stake	Staking rewards, community benefits, permanently activated once joined

11 Market Advantages & Team

Elite Operational Team

Led by former talents from OKX, Bybit, and major crypto hedge funds, the BitRaxx team brings together deep industry knowledge in trading operations, community growth, and brand trust — a professional foundation built to scale globally.

Global Presence

MENA Region	Primary operations and licensing base
Southeast Asia	Active affiliate network and community growth hub
Europe	Partner expansion and institutional outreach

Project Incubation Program

BitRaxx actively supports next-generation blockchain innovation through its Project Incubation Program. Early-stage ventures gain access to the full BitRaxx ecosystem — from operational infrastructure to global community reach.

Support Area	What BitRaxx Provides
Financial Resources	Direct funding and access to the BitRaxx Investment Fund
Operational Support	Platform infrastructure, technical consulting, engineering resources

Support Area	What BitRaxx Provides
Community Access	Instant exposure across 76+ countries and 280+ affiliate teams
Launchpad Integration	Priority listing on BitRaxx Launchpad for IDOs and token launches
BRX Backing	Staking pools, rewards programs, and co-marketing support
Angel Investor Access	Early-stage opportunities for major BRX holders

Exclusive Crypto Debit Card BitRaxx provides global payment solutions through an exclusive BRX-powered debit card, enabling seamless spending across online purchases, cross-border transfers, and international investments.

12 Legal Disclaimer

Informational Purpose Only

This whitepaper is for informational purposes only and is subject to change without notice. It does not constitute financial advice, legal counsel, or investment recommendation.

No Securities Offering

The BRX token is a utility token designed to function within the BitRaxx ecosystem. It does not represent equity, debt, or any financial claim against BitRaxx Global.

Risk Disclosure

Participation in digital assets involves substantial risk including market volatility, regulatory changes, cybersecurity threats, and potential total loss of capital. Conduct independent due diligence and consult qualified advisors before participating.

Forward-Looking Statements

Projections and targets in this document involve known and unknown risks. Actual results may differ materially. BitRaxx Global makes no guarantee regarding future performance.

Regulatory Compliance

The regulatory status of digital assets varies by jurisdiction. It is each participant's sole responsibility to ensure compliance with applicable laws in their region.

Token Burn Disclaimer

Burn events are publicly verifiable on-chain. Actual deflationary impact depends on platform adoption, trading volume, and user participation. No guarantee is made on burn frequency or volume.
